-----------------------	--

Products:	Modular power components and power systems for converting electrical power.
-----------	---

Customers:

The applications in which our products are used are typically in the higher-performance, higher-power segments of the market segments we serve. Our products are sold worldwide to customers ranging from smaller, independent manufacturers of highly specialized electronic devices to original equipment manufacturers (OEMs), original design manufacturers (ODMs) and their contract manufacturers. Our Advanced Products serve customers concentrated in the data center and hyperscalar segments of enterprise computing, in which our products are used for voltage distribution on server motherboards, in server racks, and across datacenter infrastructure, plus applications in aerospace and aviation, defense electronics, industrial automation, instrumentation, test equipment, solid state lighting, telecommunications and networking infrastructure, and vehicles (notably in autonomous driving, electric vehicle, and hybrid vehicle niches of the vehicle segment). Our Brick Products serve customers in aerospace and defense electronics, industrial automation, industrial equipment, instrumentation and test equipment, and transportation (notably in rail and heavy equipment applications).

Manufacturing:

Power components are manufactured using highly automated processes in Vicor's ISO 9001:2015 registered facilities in Andover, MA

Customer support:

Vicor serves its customers through several sales channels: a direct sales force; a network of independent sales representative organizations in North America and South America; independent, authorized non-stocking distributors in Europe and Asia; and three authorized stocking distributors worldwide. Field Applications Engineers, who are located in all of our offices, provide direct technical sales support worldwide by reviewing new applications and technical matters with our channel partners in support of existing and potential customers. Vicor's Customer Service staff works to ensure that each customer receives a rapid and professional response for each business transaction.

Calibration: Computerized calibration system for Inspection, Measuring and Test Equipment, in accordance with ISO 9001: 2015, which includes National Institute of Standard and Technology (NIST) traceable documented calibration control standards. All calibrated instruments have labels attached indicating gage ID number, date of last calibration, calibration technician identification and next calibration due date.

Net revenues for the years ended December 31 (000's):	2019:	\$262,977
	2018:	\$291,220
	2017:	\$227,830
	2016:	\$200,280
	2015:	\$220,194

Number of shifts:	Brick Products:	2 shifts/5 days per week
	Advanced Products:	3 shifts/5 days per week (plus partial 3rd shift)

Quality system: Quality manual: Copy is available upon request
Quality system certification: ISO 9001: 2015
Certificate registration number: 951 00 0665
Date issued: November 8, 2017

This certificate is valid until: November 30, 2020
Registrar: TUV SUD America Incorporate

CERTIFICATE

The Certification Body of
TÜV SÜD AMERICA INC.

hereby certifies that

VICOR Corporation
25 Frontage Rd
Andover, MA 01810 USA
(see page 2 for additional locations)

has implemented a Quality Management System
in accordance with:

ISO 9001:2015

The scope of this Quality Management System includes:

**Design, Development, Sales, Manufacture and
Marketing of High-Density Modular Power System
Components, Complete Power Systems to Power
Contemporary Electronic Circuits, and Power
Management Solutions Including High Performance
Analog and Mixed Signal Technologies**

Certificate Expiry Date: November 30, 2020

Certificate Registration No: 951 00 0665

Effective Date: November 8, 2017

Mark Alpert
