

## Sine Amplitude Converter™ (SAC™)

### Features & Benefits

- 38.4V<sub>DC</sub> to 1.2V<sub>DC</sub> 76A current multiplier
  - Operating from standard 48V or 24V PRM™ regulators
  - Up to 52 Volts DC input
  - K of 1/32 provides up to 76A DC output current
- High efficiency (>92%) reduces system power consumption
- High density (1212A/in<sup>3</sup>)
- Vicor's 0823 ChiP package enables low impedance interconnect to system board
- Provides enable / disable control, internal temperature monitoring, internal current monitoring
- ZVS / ZCS resonant Sine Amplitude Converter topology
- Parallel up to 10 modules

### Typical Applications

- Computing and Telecom Systems
  - Optimized for Memory and High Power ASICs
- Automated Test Equipment
- High Density Power Supplies
- Communications Systems

Product Ratings	
V <sub>IN</sub> = 0 to 52V	I <sub>OUT</sub> = 76A (nom)
V <sub>OUT</sub> = 0 to 1.63V (no load)	K = 1/32

### Product Description

The Vicor's 0823 ChiP VTM current multiplier is a high efficiency (>92%) Sine Amplitude Converter™ (SAC™) operating from a 0 to 52V<sub>DC</sub> primary bus to deliver a 0 to 1.63V<sub>DC</sub> low voltage output. The Sine Amplitude Converter offers a low AC impedance beyond the bandwidth of most downstream regulators; therefore capacitance normally at the load can be located at the input to the Sine Amplitude Converter. Since the K factor of the VTM is 1/32, the capacitance value can be reduced by a factor of 1024, resulting in savings of board area, materials and total system cost.

The VTM is provided in Vicor's 0823 ChiP package compatible with standard pick-and-place assembly processes. The co-molded ChiP package provides enhanced thermal management due to a large thermal interface area and superior thermal conductivity. The high conversion efficiency of the VTM increases overall system efficiency and lowers operating costs compared to conventional approaches.

The VTM enables the utilization of Factorized Power Architecture™ which provides efficiency and size benefits by lowering conversion and distribution losses and promoting high density point of load conversion.

## Pin Configuration

## Pin Numbering and Descriptions

Pin Number	Signal Name	Type	Function
A1, A2 C1, C2 E1, E2	+OUT	OUTPUT POWER	Positive output terminal
B1, B2 D1, D2 F1, F2, I2	GND	POWER RETURN	Negative power terminal, internally connected
G1	EN	INPUT	To disable VTM in system
G2	TM	OUTPUT	Temperature monitor and Power Good Flag
H1	VCC	INPUT	Power train controller supply
H2	CM	OUTPUT	Current monitor
I1	+IN	INPUT POWER	Positive input terminal

**Vicor's comprehensive line of power solutions includes high density AC-DC and DC-DC modules and accessory components, fully configurable AC-DC and DC-DC power supplies, and complete custom power systems.**

### **Vicor's Standard Terms and Conditions and Product Warranty**

All sales are subject to Vicor's Standard Terms and Conditions of Sale, and Product Warranty which are available on Vicor's webpage (<http://www.vicorpower.com/termsconditionswarranty>) or upon request.

### **Life Support Policy**

VICOR'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS PRIOR WRITTEN APPROVAL OF THE CHIEF EXECUTIVE OFFICER AND GENERAL COUNSEL OF VICOR CORPORATION. As used herein, life support devices or systems are devices which (a) are intended for surgical implant into the body, or (b) support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system or to affect its safety or effectiveness. Per Vicor Terms and Conditions of Sale, the user of Vicor products and components in life support applications assumes all risks of such use and indemnifies Vicor against all liability and damages.

### **Intellectual Property Notice**

Vicor and its subsidiaries own Intellectual Property (including issued U.S. and Foreign Patents and pending patent applications) relating to the products described in this data sheet. No license, whether express, implied, or arising by estoppel or otherwise, to any intellectual property rights is granted by this document. Interested parties should contact Vicor's Intellectual Property Department.

The products described on this data sheet are protected by the following U.S. Patents Numbers:

5,945,130; 6,403,009; 6,710,257; 6,911,848; 6,930,893; 6,934,166; 6,940,013; 6,969,909; 7,038,917; 7,145,186; 7,166,898; 7,187,263; 7,202,646; 7,361,844; D496,906; D505,114; D506,438; D509,472; and for use under 6,975,098 and 6,984,965.
